Foundations of American Democracy

Developing Understanding

More than 200 years after the U.S. Constitution was ratified, the compromises that were necessary for ratification—which in some instances led to ambiguity—continue to fuel debate and discussion over how best to protect liberty, equality, order, and private property. This first unit sets the foundation for the course by examining how the framers of the Constitution set up a structure of government intended to stand the test of time. Compromises were made during the Constitutional Convention and ratification debates, and these compromises focused on the proper balance between individual freedom, social order, and equality of opportunity. In subsequent units, students will apply their understanding of the Constitution to the institutions of government and people’s daily lives.

Building the Disciplinary Practices

In the study of government and political science, text-based qualitative sources help political scientists understand how governmental and political institutions and actors function and the reasons for their behaviors. These sources are often actually arguments about what the government does (or should do) and how these actions impact citizens and other people in the country.

In this course, students also learn to write their own arguments. Arguments should be organized around a specific reasoning process that aligns to the purpose for writing (e.g., to explain similarities and differences among political principles, or to explain political processes). Choosing the right reasoning process allows students to establish the line of reasoning for the argument and helps them organize the essay.

In their arguments, students should write claims that take a position, going beyond simply stating facts. Claims should also include additional information that sets up the evidence. This is usually developed through a “because” statement, as in “My claim is the strongest because . . .”, which is then followed by specific relevant evidence. Evidence is relevant when it relates to and supports the claim.

Preparing for the AP Exam

The AP U.S. Government and Politics course requires students to apply their knowledge in a variety of contexts and to real-world scenarios. It’s not enough for students to know the definition of governmental terms and concepts. On the AP Exam, they will be asked to show a deeper understanding of how these concepts actually work, often by describing and explaining an interaction or application within a given scenario on both multiple-choice and free-response questions.

Students often struggle with explanations. They may define or describe a concept but not fully explain the how or why in the context of the question. Have students practice by asking them to explain the steps, stages, and interactions of processes; explain and link causes and effects; or explain the significance of similarities and differences.

Interactions Among Branches of Government

Developing Understanding

In this unit, students continue to explore policy making, focusing on its complexity and the idea that it is a process involving multiple governmental institutions and actors. Students will look at issues or policies from several different perspectives and then apply their knowledge to better understand the complexity of the policy-making process.

The Constitution grants specific powers to Congress, the presidency, and the courts, each of which exercises informal powers (developed through political practice, tradition, and legislation). Because power is widely distributed, and checks prevent one branch from overreaching or usurping powers from the others, institutional actors are in the position where they must both compete and cooperate in order to govern.

Building the Disciplinary Practices

The gerrymandering cases in this unit provide an opportunity to introduce students to Supreme Court case analysis. It can help to start by having students describe the facts of the cases, focusing on the reasoning behind the majority opinion. Students often get stuck on the details of a case, or what they think is fair. Guide them to focus on the constitutional issues the justices applied when deciding the case. This focus will help students connect the details from a required case to other sources.

This unit also introduces students to data analysis. Provide opportunities for students to practice identifying data from different types of graphs. At this point in the course, you can have them practice identifying data, patterns, and trends in the data, and drawing conclusions. Students will need direction in order to know how to draw conclusions and apply information from data. Help them practice these skills by linking data to political behaviors using the different branches of government or budgets of bureaucratic agencies.

Preparing for the AP Exam

On the AP Exam, students will need to make connections between political concepts, Supreme Court cases, and arguments in text-based sources. One way that political scientists often think about those connections is to make comparisons between concepts, and students will need to make comparisons and draw conclusions on both the multiple-choice questions and the free-response questions.

When making comparisons, it’s important for students to begin by identifying the relevant categories of comparison (i.e., what characteristic or attribute they should compare). Two common mistakes that students make are discussing similarities and differences that are 1) not relevant based on the given task or 2) not shared by the objects of comparison. Once students have identified an appropriate and relevant category of comparison, they can then develop their explanation of why the similarities or differences exist and why they are significant.

Required Course Content

ENDURING UNDERSTANDING
CON-3
The republican ideal in the U.S. is manifested in the structure and operation of the legislative branch.

LEARNING OBJECTIVE
CON-3.C
Explain how congressional behavior is influenced by election processes, partisanship, and divided government.

ESSENTIAL KNOWLEDGE
CON-3.C.1
Congressional behavior and governing effectiveness are influenced by:
- Ideological divisions within Congress that can lead to gridlock or create the need for negotiation and compromise
- Gerrymandering, redistricting, and unequal representation of constituencies have been partially addressed by the Supreme Court decision in Baker v. Carr (1962), which opened the door to equal protection challenges to redistricting and started the "one person, one vote" doctrine, and the no-racial-gerrymandering decision in Shaw v. Reno (1993)
- Elections that have led to a divided government, including partisan votes against presidential initiatives and congressional refusal to confirm appointments of "lame-duck" presidents of the opposite party
- Different role conceptions of "trustee," "delegate," and "politico" as related to constituent accountability in each chamber

ESSENTIAL KNOWLEDGE

CON-4.A.1
Presidents use powers and perform functions of the office to accomplish a policy agenda.

CON-4.A.2

- Vetoes and pocket vetoes—formal powers that enable the president to check Congress
- Foreign policy—both formal (commander-in-chief and treaties) and informal (executive agreements) powers that influence relations with foreign nations
- Bargaining and persuasion—informal power that enables the president to secure congressional action
- Executive orders—implied from the president’s vested “executive power,” or from power delegated by Congress, executive orders allow the president to manage the federal government

ESSENTIAL KNOWLEDGE
CON-4.B.1
The potential for conflict with the Senate depends upon the type of executive branch appointments, including:

- Cabinet members
- Ambassadors
- White House staff

CON-4.B.2
Senate confirmation is an important check on appointment powers, but the president’s longest lasting influence lies in life-tenured judicial appointments.

Civil Liberties and Civil Rights

13–18% AP EXAM WEIGHTING

~26/~13 CLASS PERIODS
Remember to go to AP Classroom to assign students the online Personal Progress Check for this unit.

- Argument Essay (partial)
- Argument Essay (partial)
Civil Liberties and Civil Rights

Developing Understanding

Students will connect the founding principles of our government to the debates over the appropriate balance of liberty and order, noting how citizens and other groups have pursued policy solutions to protect the civil liberties and civil rights of all Americans, laying the foundation for later discussions about other ways citizens can participate in the government.

The U.S. Constitution, primarily through the Bill of Rights and the Fourteenth Amendment, protects the civil liberties and civil rights of citizens, though the extent of those protections and the need to protect the safety and general welfare of individuals has long been debated. Through social movements, legal challenges, and acts of Congress, citizens have attempted to restrict the government from unduly infringing on individual rights and from denying equal protection under the law.

Building the Disciplinary Practices

This unit focuses on the analysis and application of SCOTUS cases. In addition to knowing the facts and decision of the required SCOTUS cases, students should analyze the majority opinion, focusing on the constitutional issues (such as the various interpretations of the Bill of Rights, including the due process clause) considered by the justices. This level of knowledge allows students to think like political scientists and compare two cases that relate to the same constitutional issue and draw conclusions about why the Supreme Court may have ruled in a similar or different way in each case.

Students continue to develop the practice of argumentation in this unit by using relevant evidence to support their claim. When using documents as evidence, students should not focus on summarizing the content of a document, but instead on explaining the significance of the evidence and explaining how and why it supports the claim and line of reasoning.

Preparing for the AP Exam

The SCOTUS comparison free-response question on the AP Exam asks students to go beyond simply identifying the similarities and differences between cases. They apply information from a required case and explain how that information is relevant to a non-required case. Then, students demonstrate the ability to transfer understanding of political concepts, behaviors, or processes from a required Supreme Court case to a non-required one.

Students should be able to use the required Supreme Court cases in other ways, such as applying knowledge about a required case to a reading, a scenario, and possibly a political cartoon. Students often struggle with analyzing political cartoons. They should practice interpreting visual clues and then using these clues to determine the argument and relate it to political principles, institutions, processes, or behaviors.

| 1        | 3.2   | Graphic Organizer  
To practice comparing required Supreme Court cases to a related case, give students a pair of cases—for example, *Wisconsin v. Yoder* (1972) and *Oregon v. Smith* (1990)—and have them use a Venn diagram to come up with similarities and differences between the cases. Guide students to use valid categories for comparison, such as facts, majority opinion, and the reasoning (constitutional question) for the majority opinion. |
| 2        | 3.3   | Think-Pair-Share  
To practice comparing required Supreme Court cases to a related case, give students a pair of cases—for example, *Tinker v. Fraser* and have them use Think-Pair-Share to come up with similarities, differences, and relevance to political institutions or processes. |

Ask students to discuss the arguments presented in "Letter from a Birmingham Jail." Have some students form an inner circle to discuss how the arguments relate to political activism and how citizens can affect our government and its policies. The remaining students will form an outer circle to listen, respond, and evaluate. |
| 4        | 3.11  | Matching Claims and Evidence  
Ask small groups of students to write claims and supporting evidence statements based on an argument essay question (such as *Which had more of an impact on the expansion of civil rights: an activist Supreme Court, a motivated legislature, or movements by citizens?*). Have groups trade claims and evidence, revise or modify the claims (if necessary), match the claims and evidence, and write statements explaining why the evidence supports the claim. |

American Political Ideologies and Beliefs

Developing Understanding

Connecting the application of political science methods to the development of social and economic policies that Americans support, advocate for, and adopt is foundational to understanding the ideologies of political parties and patterns of political participation. American political beliefs are shaped by founding ideals, core values, linkage institutions (i.e., elections, political parties, interest groups, and the media in all its forms), and the changing demographics of citizens. These beliefs about government, politics, and the individual’s role in the political system influence the creation of public policies.

Building the Disciplinary Practices

This unit provides a great opportunity to integrate data analysis with an investigation of American attitudes about government and politics, how those attitudes develop and change over time, and how political scientists measure and evaluate political attitudes and behaviors. Students should be able to correctly interpret and connect what they see in the data to course concepts in order to draw conclusions. Drawing conclusions requires students to make inferences based on the patterns and trends in the data and their knowledge of political concepts.

Preparing for the AP Exam

The AP Exam requires students to analyze quantitative data presented visually and apply that analysis to their understanding of political concepts in both the multiple-choice and free-response sections.

In both types of questions, students will need to be able to: (1) identify and describe the data, (2) describe patterns or trends in data, (3) draw conclusions about patterns or trends in data, and (4) explain how the data relates or demonstrates a political concept, principle, or behavior.

Students often struggle to connect conclusions drawn from data to political concepts, such as behavior. Encourage them to take their conclusions further and explain the relationship. Political scientists use data and their knowledge of political institutions and processes to explain how, for example, members of a political party, voters, or interest groups may react to certain public opinion data.

Political Participation

Developing Understanding

Students should understand the many ways that they can influence policy-makers and impact the decisions that will affect their daily lives.

The principle of rule by the people is the bedrock of the American political system and requires that citizens engage and participate in the development of policy. Under our Constitution, governing is achieved directly through citizen participation, although there are institutions (e.g., political parties, interest groups, and mass media) that inform, organize, and mobilize support to influence government and politics, resulting in many venues for citizen influence on policy making.

Building the Disciplinary Practices

Throughout the course, students have been gradually introduced to argumentation and have had regular opportunities to practice this skill. In this unit, students continue to write defensible claims, support claims with relevant evidence, and establish a line of reasoning, but now also use refutation, concession, or rebuttal when they respond to alternative perspectives.

Just as political scientists do in their arguments, students should be able to identify an opposing or alternate perspective about a political principle, institution, process, or behavior and use evidence to explain why that perspective is not as valid or credible as their own claim.

As students build toward more complex skills, it helps to ask them to identify and explain limitations they discover when analyzing and interpreting quantitative data. Limitations can include data from a limited demographic, opt-in polling (like on social media), a biased polling source, the way questions were asked, and more.

Preparing for the AP Exam

To complete their argument essays, students will respond to an opposing or alternative perspective. It is not enough for students to simply identify an opposing or alternative perspective. They must demonstrate a correct understanding of the perspective by briefly describing it, and then refute, concede, or rebut that perspective.

This task is often difficult for students. Many students can identify an opposing or alternative perspective, but they struggle to explain why the other perspective is incorrect or why another perspective might be equally as valid as their own argument. To help students master this skill, ask them to identify evidence that would support an alternative perspective when establishing their own claims. Then, have them explain why, in the face of this evidence, they still chose to support a different claim. This thought process shows students one way of effectively rebutting, refuting, or conceding an alternative perspective. Key phrases such as “while some may argue” or “even though some evidence supports” can help them frame their counterarguments.
